

PRODUCT INFORMATION

ACCESS PLATFORMS

Description:

Custom designed access/maintenance platforms made from aluminum have for years been a product supplied by ATC.

In close cooperation with our customers we make a design improving both safety, as well as working environment and access to the maintenance object.

This particular maintenance system was designed together with the customer achieving a flexible system, giving safe access to all maintenance areas.

The system can also be dismantled into elements allowing it to be transported in a standard 20' ISO container.

ATC have done all engineering and fabrication of this maintenance platform.
