

PRODUCT INFORMATION

COFFEE SHOP CONTAINERS

Description:

A custom made container special designed to customers own specification. Size can be delivered to meet specific requirements and the structure can be made in Painted Mild steel or Stainless Steel.

The container can be delivered with A0/A60 classification and is certified to DNV 2.7.1 and/or 2.7.3.

Layout and no of rooms can vary, this example consists of 5 rooms, including separate non smoking and smoking rest rooms with seating for up to 11 people in each room. Both rooms including fridge, coffe machine and water heater.

The container has a common entrance with dishwasher, cupboards and an HVAC control panel. 2 separate toilets with wash basins are also included.

ATC design and install the ventilation system, including high efficiency louvers, supply and extract fans, heating coils, attenuators and internal ductwork.

All piping is installed with drains from the wash basins, dishwasher and toilets.

The electrical installation is also complete, with lighting and includes electric socket outlets for all electrical appliances.

All interface connections to the platform supply are terminated to junction boxes mounted on the wall outside the container.
