

### Trans Constructions' Company Management quality policy is detailed below:-

- To Engineer, fabricate, procure, install and deliver products and services of the correct quality within agreed time limits and be considered as a serious partner within the market.
- Build a mutually profitable relationship with our customers, ensuring their long-term success, by understanding their needs .
- Ensure continual improvement of the Companies Quality Management system based upon efficient business processes, well-defined measurements, best practices, and customer surveys.
- Develop staff competencies through appropriate development programs, showing strong management involvement and commitment.
- Establishing a positive co-operation with the company's suppliers.
- Ensure safety for personnel and environment as defined in the Companies HSE policy.

Through the use of these guiding principles, everyone in Trans Construction AS is accountable for fully satisfying our customers by meeting or exceeding their needs and expectations using best-in- class solutions and services.

Our goal is 100% customer satisfaction, 100% of the time.
