

PRODUCT INFORMATION

OFFICE CONTAINERS

Description:

This custom built office container is designed with noise reduction in mind.

Thick steel plates, special windows and door, several layers of Rockwool and plaster boards are used to reduce noise from aircrafts.

With a typical size of approx 3,5 x 3 x 2,8m (L x W x H metres) and an approx total weight of 3300 kg the container is ideal as both a temporary or permanent solution.

ATC can also supply the ventilation system, fuse box, lighting and small power outlets.
