

PRODUCT INFORMATION

SWITCHGEAR CONTAINERS

Description:

This is an example of a standard 20' ISO container which has been re-built and modified by ATC for installation of large electrical switchgears.

The height can also be adjusted and in addition to Mild Steel, Stainless steel or Aluminium is also possible for the structure.

The modification involves foundations for the customer supplied equipment, insulation and cladding, entrance door, escape hatch, electrical installation, ventilation openings and four HVAC units.

Containers such as the one shown in this example show the flexibility of such solutions, through close cooperation between ATC and their customers.
