

PRODUCT INFORMATION

WEATHER ENCLOSURES

Description:

Custom made containers, special designed as a watertight enclosures, for housing equipment which is very exposed to the weather.

These can be made from Mild Steel, Stainless Steel or Aluminium, with sizes to suit customers specific requirements.

This particular example is an A0 enclosure for Air Handling Units, with a total weight of 10 tonnes and measuring 7 x 2,5 x 3 metres.

The containers can be insulated to A0 or A60 if required and are certified for lifting in accordance with DNV 2.7.1

The main challenge for designing and building these kind of containers is to ensure the interfaces match exactly and that once the enclosure is in place, it is still possible to fully maintain and service the equipment inside.
