

# PRODUCT INFORMATION

## A60 LABORATORY CONTAINERS

### **Description:**

A custom made container, designed and built to operate as a full functioning laboratory. This example is Mild Steel, painted, but both Stainless Steel and Aluminium are also possible.

The container has a stainless steel pneumatic sliding door.

The container includes benches, sink, lights, fume cabinet and hazardous material storage cabinet.

It is delivered fully complete internally with all interface connections terminated in junction boxes on the outside wall, for easy coupling to platform supply.

ATC take full multi-discipline responsibility including design and structural calculations, layout, outfitting including procurement of cabinets and furniture etc, Electrical, Instrumentation, Fire and Gas, Telecom and the Internal Ventilation, including ductwork.
