LIGHTWEIGHT SHELTERS - LATVIA

Year : 2009  
Project Name : Lightweight shelters - Latvia  
ATC project no. : 2107

Size (L x W x H mm ): 4570 x 2320 x 2550  
Weight (kg) : 990 kg  
Materials : 1,5 mm Mild Steel, painted.

## Project Description / Scope of Work:

4 Lightweight shelters were delivered to Latvia.

The shelters were insulated in the walls and roof with 50 mm rockwool, internal surfaces were then covered with 11 mm MDF panels.  
The floor was insulated with 100 mm rockwool, covered with 18 mm plywood and finished with a 1,5 mm PVC covering.

# JOB REPORT

800 x 2000mm lockable doors with door pumps were installed on the end walls and painted the same color as the rest of the container.

Penetrations were included in the container for electric cables and a fuse box was installed inside with automatic fuses.

Each container was supplied with 4 internal light fittings, a light switch and 6 double electric contacts wired back to the fuse box.

2 electric radiators were installed in each container

2 Air conditioning units each with 3,5 kw cooling capacity were supplied with each container.

Finally each container was equipped with 4 collapsable chairs and sheving along the longest side of the container.

Internal layout, showing openings for A/C units, lighting and shelving
